

Project Design Phase-I

Solution Architecture

Team ID	PNT2022TMID50703
Project Name	Project – Handwritten Digit Recognition System

Solution Architecture:

- The handwritten digit recognition is the ability of computers to recognize human handwritten digits.
- The applications of digit recognition include in post mail sorting, bank check processing and form data entry.
- In handwritten digit recognition system, recognition accuracy and computation time still require further improvement.
- In handwritten digit recognition system, recognition accuracy and computation time still require further improvement.
