

OBSERVING THE METRICS

Team ID	PNT2022TMID50703
Project Name	A Novel Method for Handwritten Digit Recognition System

Observing the metrics:

```
metrics=model.evaluate(X_test,y_test,verbose=0)
print("loss & accuracy")
print(metrics)

loss & accuracy
[0.0794665738940239, 0.9775000214576721]
```

There are printing the metrics which lists out the Test loss and Test accuracy

- Loss value implies how poorly or well the iteration optimization.
- The accuracy metric is used to measure the algorithm's performance in an interpretable way.
